Zelup Gun

3 in
1

Based on hydro-pneumatic fragmentation, a new technology patented by Zelup®, it consumes only 15L of water per hour, or 40 times less than a high-pressure cleaner.

This low water consumption not only saves money but also allows indoors use.

The Zelup Gun does not create spills or splashes; water does not seep in the joints and does not splash the cleaned surfaces.

Equipped with an ingenious two-positions trigger, it alternates instantly between washing (1) and drying (2) modes.

The Zelup Gun washes, brushes and dries!

15L/h
